INTERGRATED TECHNOLOGY ASSESSMENT

UNITED SECURITY USI

Make Informed Decisions

Gain clarity, Improve performance and Make informed decisions.

Integrated Technology Assessments

Your security technology should work for you, not against you. An Integrated Technology Assessment helps you understand what's working, what isn't, and where you may be exposed. Whether you're managing a single site or a portfolio of properties, these assessments give you the insight to take meaningful, cost-effective action.

How An Assessment Benefits Your Property

Spot Security Gaps
Identify blind spots, outdated systems, and weak access points.

Save on Costs
Learn what to upgrade and what you can keep.

Boost System Performance
Make your technology work better together.

Stay Compliant
Align your systems with current regulations and standards.

Plan for the Future
Get a clear, phased roadmap based on your goals and budget.

CASE STUDY

Situation
A mixed-use property faced access delays, tenant complaints, and poor video footage, with unclear causes, whether user error, tech issues, or system integration problems.

Challenges
- Multiple disconnected systems
- Poor video quality and delayed playback
- Inconsistent access permissions
- Lack of visibility into system performance

Assessment Results
- **System Audit:** Mapped all current equipment and revealed redundancies
- **Access & Video Review:** Identified missed areas and outdated firmware
- **Integration Plan:** Recommended centralized platform to streamline management
- **Phased Strategy:** Delivered a roadmap to modernize over 12 months without disruption

What You Walk Away With

- A clear report on current system performance
- Identification of immediate risks or inefficiencies
- Straightforward recommendations, not a sales pitch
- Peace of mind that your technology is working as hard as you are
